DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-22, drawn to a coplanar waveguide test probe, classified in class 324, subclass 754.
- II. Claims 23-25, drawn to a method of fabricating a micro-coaxial probe, classified in class 29, subclass 592.1.

The inventions are distinct, each from the other because:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process as claimed can be used to make a different product such as a capacitive probe.

A telephone call was made to Frederick Cooperrider on 11/28/2005 to request an oral election to the above restriction requirement, but did not result in an election being made.
